

Nested Loops

Mr. Poole
Python

Given, we've created a single line!

Example output:

Please enter line length: **4**

Do you want a horizontal or vertical line? **Horizontal**

* * * *

What if we want to create a full box???

What if we want to create a full box???

Example output:

Please enter line length: **4**

Do you want a horizontal or vertical line? **Horizontal**

*	*	*	*
*	*	*	*
*	*	*	*
*	*	*	*

All we would do, is create say 4 lines!

Outlined are 4 sets of lines that make up a box!

Nested Loops

Example output:

Please enter line length: **4**

Do you want a horizontal or vertical line? **Horizontal**

*	*	*	*
*	*	*	*
*	*	*	*
*	*	*	*

To do this, we would loop our line code 4 times!

Lab: Nested Loops

1. Create a program that asks for a symbol, width, and height and it'll create a box of that given symbol.

Example Output:

What symbol would you like to use? &

What's the width of your box? 5

What's the height of your box? 3
